

## **1. Deep Sea Fish Conservation**

**Prelims Syllabus:** National Conservation & Mitigation

**Mains Syllabus:** GS-III Conservation, environmental pollution and degradation, environmental impact assessment.

### **Why in News?**

- Supreme Court (SC) has given permission to fishermen using Purse Seine Fishing gear to fish beyond territorial waters (12 nautical miles) and within the Exclusive Economic Zone (EEZ) (200 nautical miles) of Tamil Nadu but observing certain restrictions.

### **About the News:**

- This comes in the backdrop against the banning of purse seine fishing by the Tamil Nadu Government in February 2022.
- SC has restricted the purse seiner to fish on two days, Monday and Thursday from 8am to 6pm revoking the complete ban imposed by Tamil Nadu government.

### **What are the Concerns?**

#### **Insufficient Conservation Efforts:**

- Court's order seems to be more concerned about regulating fishing with administrative and transparency measures than about the conservation measures and obligations under the United Nations Convention on the Law of the Sea (UNCLOS).

- Under UNCLOS, coastal states have sovereign rights to ensure that the living and non-living resources of the EEZ are used, conserved and managed, and not subject to overexploitation.
- In order to prevent overexploitation, coastal States must determine the total allowable catch (TAC) in the EEZ.
- Restricting the purse seiner to fish on two days is not sufficient without regulating fishing methods.

### **Threatens Livelihood of Traditional Fishers:**

- Purse seiners tend to overfish, unlike traditional fishermen using traditional fish gear, thus endangering the livelihood of the traditional fisher.
- It is a non-targeted fishing gear and catches all sorts of fishes which come in the way of the net, including juveniles. Hence, they are very much detrimental to marine resources.

### **Threat to Food Security:**

- A major concern is the dwindling availability of oil sardines, a favourite of Kerala fish eaters.
- In 2021, Kerala recorded a catch of just 3,297 tonnes of sardine, a sharp decrease from the haul of 3.9 lakh tonnes in 2012.

### **Threatens Endangered Species:**

- Non-selective fishing methods by purse seiners resulting in the by-catch of other marine living species (which could include endangered species too) may threaten with a potential trade embargo.

### **What is UNCLOS?**

- The UNCLOS, 1982 is an international agreement that establishes the legal framework for marine and maritime activities. It is also known as Law of the Sea. It divides marine areas into five main zones namely- Internal Waters, Territorial Sea, Contiguous Zone, Exclusive Economic Zone (EEZ) and the High Seas.
- It is the only international convention which stipulates a framework for state jurisdiction in maritime spaces. It provides a different legal status to different maritime zones.
- It provides the backbone for offshore governance by coastal states and those navigating the oceans.
- It not only zones coastal states' offshore areas but also provides specific guidance for states' rights and responsibilities in the five concentric zones.

### **What is Purse Seine Fishing?**

- A purse seine is made of a long wall of netting framed with floating and leadline and having purse rings hanging from the lower edge of the gear, through which runs a purse line made from steel wire or rope which allow the pursing of the net.
- The technique is considered to be an efficient form of fishing and has been widely deployed on India's western coasts.
- It is used in the open ocean to target dense schools of single-species pelagic (midwater) fish like tuna and mackerel.

### **What are the Conservation Efforts for Marine Animal Resources?**

#### **The United Nations General Assembly passed Resolutions in 1989 and 1991:**

- It called for a moratoria on all large-scale pelagic drift net fishing vessels in high seas.

#### **UN (United Nations) Ocean Conference 2022:**

- To ensure global cooperation towards protection and sustenance of the Ocean ecosystem of the world.

#### **One Ocean Summit:**

- Combating illegal fishing, decarbonising shipping and reducing plastic pollution.

#### **Convention for the Conservation of Southern Bluefin Tuna 1993 (SBT):**

- The objective of this Convention is to ensure, through appropriate management, the conservation and optimum utilisation of southern bluefin tuna

#### **Convention for the Prohibition of Fishing with Long Drift Nets 1989:**

- It is a regional convention in the South Pacific to restrict port access for drift net fishing vessels.

#### **Tarawa Declaration 1989:**

- It is a declaration of the South Pacific Forum to prohibit the use of large drift nets or at least call for their prohibition.
